

Vermont Fish & Wildlife Department

Black River

Streambank Management Area

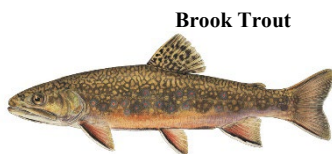

General Description

The Black, Barton, and Clyde Rivers, along with their tributaries, make up the bulk of the Lake Memphremagog watershed and offer excellent fishing opportunities in northeastern Vermont. The Black River begins in Craftsbury and runs through Albany, Irasburg, Coventry, and Newport before emptying into Lake Memphremagog. Brook, Brown, and Rainbow Trout are present throughout Black River SMA, with wild Brook and Rainbow Trout more common in the headwaters. Steelhead also move throughout the river during their spring spawning migration. Yellow Perch, Bullhead, Smallmouth Bass, Fallfish, and White, Longnose, and Redhorse Sucker can be found downstream of Coventry Falls, including within Map 9 and South Bay WMA to the north.

Potential Target Species

Brown Trout

About Streambank Management Areas

Streambank Management Areas were purchased by the Vermont Fish & Wildlife Department to ensure access to the state's rivers for angling and other recreation, and to improve habitat for aquatic species.

The following maps are for illustrative purposes only. No warranty as to the accuracy or the usefulness of the data is expressed or implied. The sign to the right indicates SMA lands.

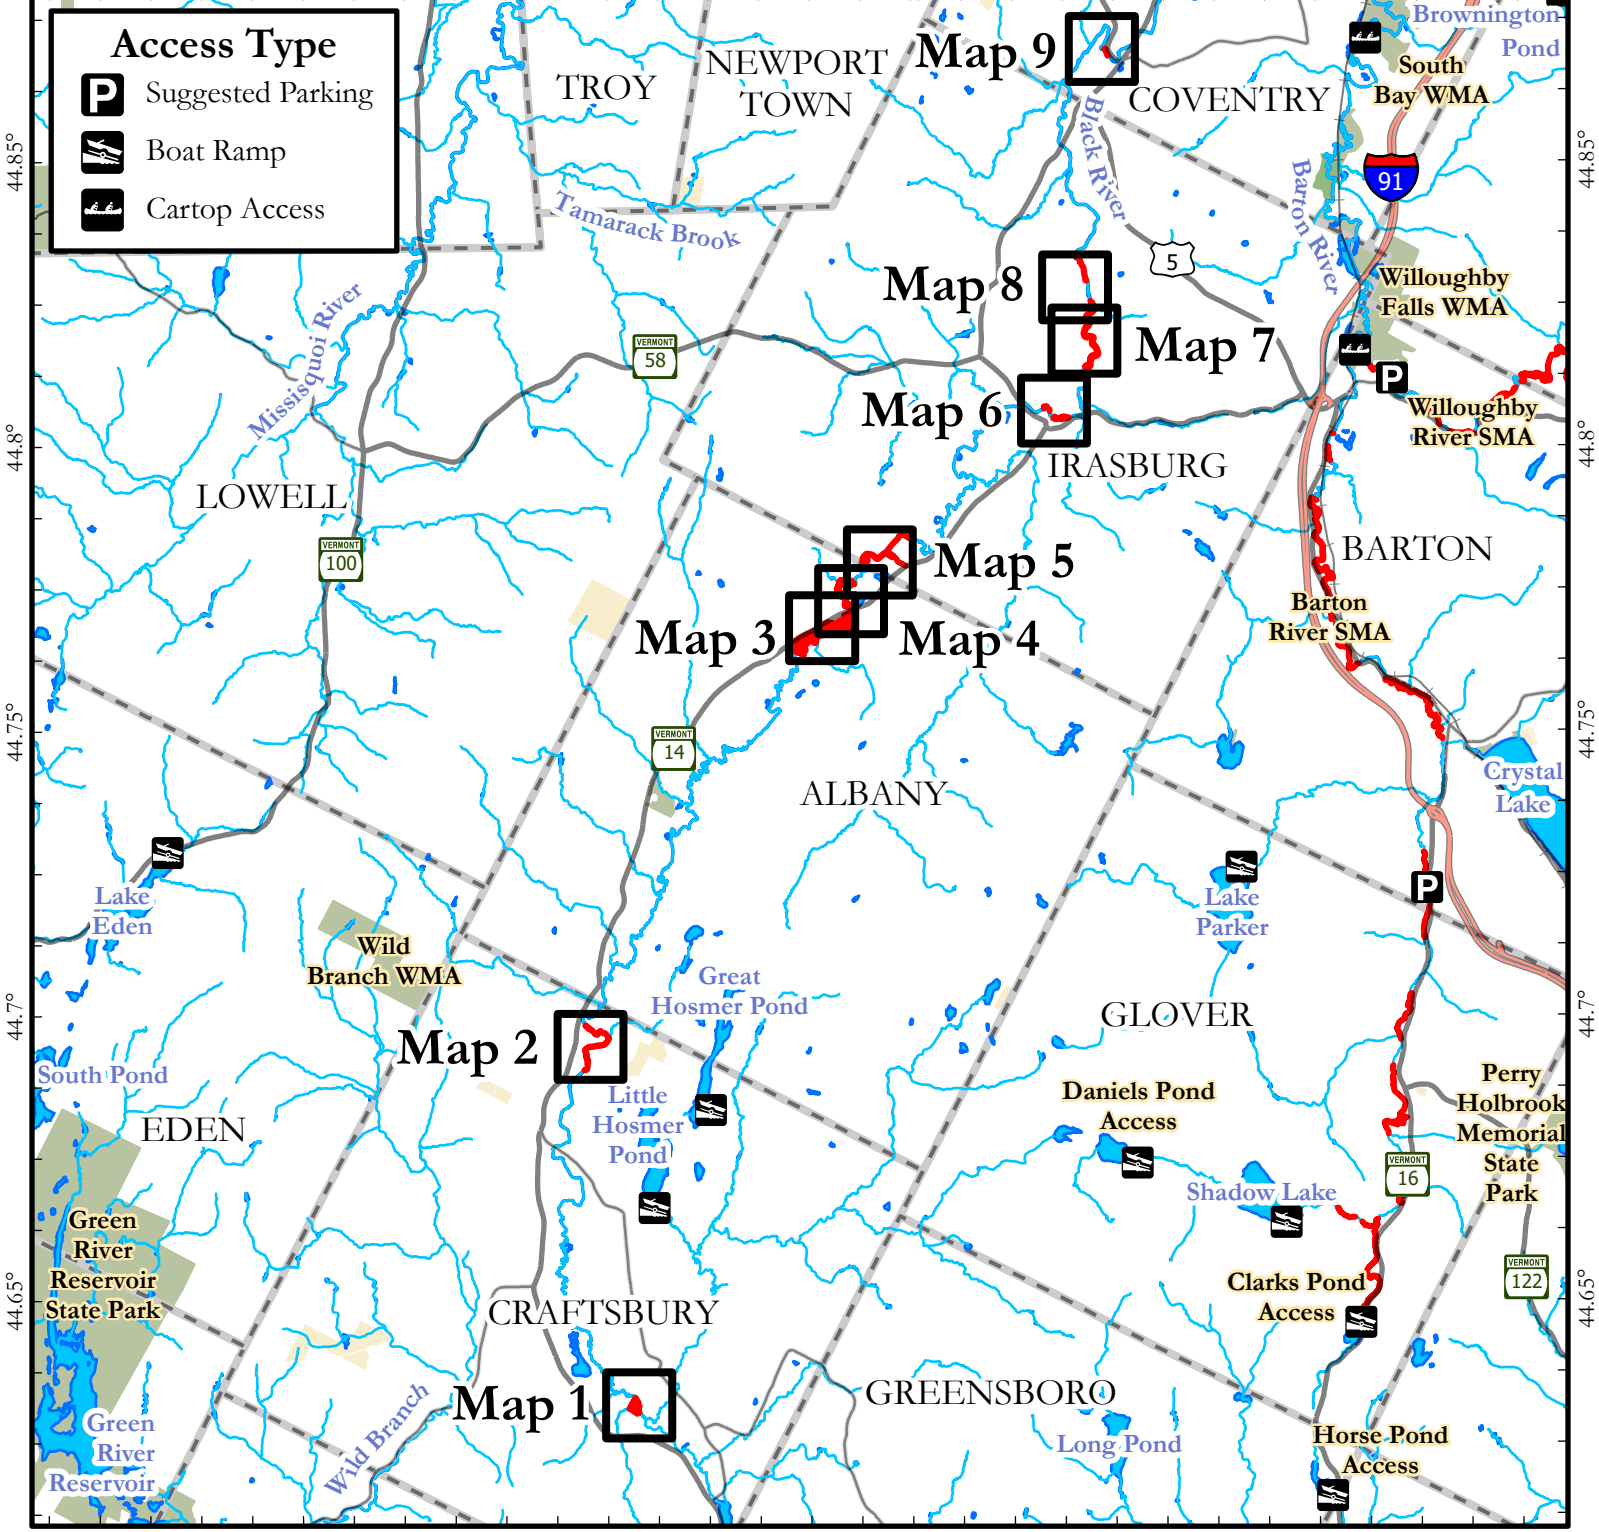

For more information regarding Black River SMA, please contact the St. Johnsbury Fisheries office at: (802) 751-0100.
