

## LIST OF FIGURES AND PHOTOGRAPHS

- 2.1. Location of Stratton Mountain Black Bear Study Area in southern Vermont.
- 2.2. Cultural features found within the Stratton Mountain Black Bear Study Area south of Route 30, 1990-1995.
- 4.1. Age structure of 49 black bears captured in the Stratton Mountain Study Area between 1989 and 1995.
- 4.2. Cause of death of study animals in the Stratton Black Bear Study Area, 1989-1995.
- 4.3. Weights of adult female black bears in the month of March, 1990-1996. Maternal weights below the Minimum Weight Threshold correspond to reduced cub survival.
- 5.1. Home ranges of female study animals during 1990.
- 5.2. Home ranges of female study animals during 1991. Soft and hard mast was extremely plentiful throughout the Study Area.
- 5.3. Home ranges of female study animals during 1992. Both hard and soft mast were almost absent over most of the Study Area causing many animals to travel widely.
- 5.4. Home ranges of female study animals during 1993.
- 5.5. Home ranges of female study animals during 1994.
- 5.6. Home ranges of female study animals during 1995.
- 5.7. Home range (95% contour) of adult male Number 11 during 1992 with telemetry locations, houses, and roads.
- 5.8. Photographs of three plant species important as food for black bears in southern Vermont.
- 5.9. Two plant species reported as extremely important black bear foods in the eastern United States.
- 5.10. Locations of beech and oak stands in the Stratton Black Bear Study Area of southern Vermont. One important source of blueberries is also shown.
- 5.11. Ecological Land Type Classification coverage for the Stratton Mountain Study Area.
- 5.12. Ecological Land Type 612A in relation to the resort village, ski trails, golf course, roads and houses.

- 5.13. Location of 59 black bear dens monitored as part of the Stratton Black Bear Study, 1990-1996.
- 5.14. Den structure type for 62 dens selected by black bears on the Stratton Mountain Study Area, 1989-1996.
- 6.1. Home range of adult female black bear No. 15 in 1994.
- 6.2. Home range of adult male black bear No. 12 in 1991.
- 6.3. Black bear telemetry locations in relation to major highways Routes 11 and 30 in southern Vermont.
- 6.4. Male and female black bear telemetry locations in relation to U.S. Route 7.
- 6.5. Home range of female black bear No. 13 in 1990 and her five primary road crossing points of Class 2 roads.
- 6.6. Map of the southeastern portion of the Stratton Mountain Study Area showing federal and private land ownership as well as Sage Hill and Route 100 black bear corridors.
- 7.1. Infrared photo of Stratton Mountain Resort use areas.
- 7.2. Map of Stratton Mountain showing analysis areas used to compare levels of study animal use between areas with varying levels of human activity.
- 7.3. Percent of mature beech trees having historical and recent bear claw scarring by designated area of the Stratton Mountain Resort.
- 7.4. Map of ski trails showing trails used by mountain bikes and by horses.
- 7.5. Special wildlife habitat and conservation areas of Stratton Mountain.
